

Dude's Vices

Some of the Dude's favorite vices are White Russians, weed, and bowling.

1. Make a single loop with lines passing through the centers of cells, horizontally or vertically. The loop never crosses itself, branches off, or goes through the same cell twice.
2. Lines must pass through all cells with booze, weed, or bowling balls.
3. Lines passing through booze or a bowling ball must pass straight through its cell, but turn in the cell either before or after or both.
4. Lines passing through weed must make a turn in its cell, but go straight through the cells before and after.
5. Letter cells can go straight or turn (but must obey the above rules if near a booze, weed, or bowling ball).
6. Not all letters are in the path.

Once you complete the loop you will discover another of the Dude's vices.

MARK IT 8, DUDE!

Today's round of bowling really seems to boggle our trio. They have no trouble getting that same first pin to fall, but there's always a couple left over. Once you've got this problem spelled out, maybe they can make sense of the day's results.

We cut off your Johnson!

Oh no! The nihilists are threatening to cut off The Dude's johnson!

To complete the puzzle, rearrange the letters from the answers to the six crossword clues (A-F) and put them each into their own column. Then determine the letters that have been cut off from some of these five famous Johnsons and help The Dude find what he really needs!

Note: Every enclosed space must contain exactly one letter. When reading a row or column, use every enclosed space that row or column crosses exactly once, even if you cross it again.
