One Size Fits All

One problem with online shopping is that it can be hard to get a sense of scale from only looking at a photo of the product. Here's a bunch of things I bought, but some of them turned out to be way bigger than I expected, and some of them are tiny!

Perhaps you could help me **group similar-sized items together** and then **label each group**?

Bar	Fry	Picture
Britain	Golf	Potatoes
Brother	Gravity	Ship
Calculator	Handkerchief	Skirt
Canyon	Intestine	Sum
Dane	Master	Tale
Depression	Order	Tolerance
Dipper	Piano	Watch
