

SEWER RATS SOLUTION

The rats end up in the sewers beneath the city. They stagger around blindly, blocking the sewers so that toilets overflow in the city bars. How should we get rid of these rats?

All four main puzzles have 11 letter answers. On the answer sheet, each column gives one letter of the solution. Use the circled letters in that column, find those letters in the sewer, and block the sewer at that point. Anything upstream of the blockage will overflow. The sewage filled bars form Braille letters. The first letter is shown above, where B, I, and W produce the Braille letter P. Solution: PAY THE PIPER.
