

This product was delivered in pieces that need putting together: fortunately, each piece has labelled connectors on the sides. The only instructions provided are as follows:

Step 1: Cut out the square pieces (× 16)

Step 2: Assemble into a 4 × 4 grid

IMPORTANT!!! Rotate and position the pieces as required to ensure touching connectors **fit together from both directions**. Sometimes it may seem that there are several possible connectors that can be joined together, but there is only one correct way that the complete product can be assembled.

CAUTION: There are _____
