

"Yule Logs"

Puzzle by Ken (Portland)

Every holiday party needs yule logs to properly Light Up all of the open spaces. Our square great hall of white tiles is shown below with its black support pillars. The non-diffuse light from each Yule log travels out in a straight line along its given row or column, and Yule logs can be placed near support pillars or in other open spaces. Some pillars already indicate in arabic numerals how many logs must be orthogonally around that column. Don't waste good wood - no two Yule logs should be in direct line of sight of each other, horizontally or vertically.

Once the great hall is all lit up, partygoers will discover Yule's true colors.

A	E	R	R	2	E	0	U	O	R
