

D - SIMPLE AS 1-2-3

“I come from a long line of number lovers,” Darnell said. “**Seriously**. But this long line of numbers is making me **dotty**. And **dash-it-all**, there are **zero breaks**! I see some sequences simple as 1-2-3... But what’s with these extra individual numbers thrown in?”

(Note: All 78 numbers below are meant to be in a one-dimensional straight line, but the page length does not allow it.)
