

Connection by Dan P(London)

Welcome back James! We've reserved your usual machine for you but strange things have been coming up on its reels lately. We're sure there's a link between them but we don't know what it is. Can you work out what type of connection they have?

FII M NUMBER

Here we have 8 rebuses indicating James Bond films, as hinted at the title of the puzzle (Connection = Bond) and "James" in the introduction. Once decoded, the key is to consider which number each film is within the entire series, starting with Dr. No as 1 and ending with Skyfall as 23. Using A=1, B=2... the given films spell out <u>COVALENT</u> – another type of bond, and the answer to this puzzle.
