

1) Notice that for each artist there is a corresponding song that would make a great cover song for them based on the artist name and the name of the song. e.g. On Side A Hüsker Dü could cover Honey Don't and The Beatles could cover Apologies To Insect Life (due to misspelling of the bug (get it?))... and so on.

2) Then when you have the artists and the songs they could cover you can use base 6 to convert to a letter. You take the artist's musical contribution (denoted by the number of notes to the left of their name) and join that with the song they are to cover's rating (from 0 to 5 stars). So Starting with Hüsker Dü we have 0 notes + 2 stars (for Honey Don't) to get 02. This maps to B in senary (base 6) notation. Then The Spinners (who could cover the song Revolution) would have 0 notes + 5 stars to get 05, which maps to E. Then British Sea Power with 3 notes + 0 stars (for The Fable Of Salty Water) makes 30, which maps to R, and so on.

3) Do the above for sides A and B and you get the answer....  
Berlin -- Off The Wall

So the band Berlin should cover Michael Jackson's Off The Wall and that is the answer.

The cover songs are ...

#### Side A

Hüsker Dü => Honey Don't  
The Spinners => Revolution  
British Sea Power => The Fable Of Salty Water  
Tomorrow => New Day Rising  
The Beatles => Apologies To Insect Life  
Home => I'll Be Around

#### Side B

The Mountain Goats => Salt Lick  
Ray Ray => Beams  
Mathematics => Saved By Zero  
Tender Trap => Hold On Loosely  
ZZ Top => In Reverse Order  
The Presets => New Radio  
The Fixx => No Children  
.38 Special => Bullet Scar  
Neotropic => South America To L.A.  
Bikini Kill => Girls With Guns
