

# Puzzled Pint July 2012

## Musical Chairs SOLUTION

The initial puzzle is a logic puzzle. For each round, you need to find the child that lost and both the shelf and bottle number which the parents drank liquor from. (Remember that are six children playing musical chairs, but only five rounds. Jessica won the game, but never played a sixth round on her own.) The flavortext encouraged players to look at the liquor bottles at the bar at the Funhouse Lounge (the evening's bar)

Logic puzzle solution and corresponding bottles:

Round	Child Out	Liquor Shelf	Liquor Bottle	Liquor
1st	Fiona	Top	2	Kettle One
2nd	Michael	Middle	9	Seagram's Seven Crown
3rd	Christabella	Middle	7	Chivas Regal (12)
4th	NathanielJoseph	Middle	4	Glenfiddich (12)
5th	Frederick	Top	9	Knob Creek (9)

All the bottles have numbers on their labels. (Several of them are the number of years they were aged.) If you take those numbers and index into the corresponding child's name, you get the final solution.

Fiona  
Michael  
Christabella  
NathanielJoseph  
Fredrick

Solution: FLASK
