

# June 2023 Answer Sheet

Welcome to Puzzled Pint!

Give us  
Feedback!

## Tonight

- We're here to help! This is not a competitive event. Ask the Game Control volunteers (GC) for hints as often as you'd like. The goal is to have fun, not to be frustrated!

## The Puzzles

- Each puzzle will solve to a short word or phrase. How? That's for you to discover.
- Need a code sheet or solving resources? Check out the Resources page on Puzzled Pint's webpage: <http://www.puzzledpint.com/resources/>
- You can use anything to help solve: Use your phone, the internet is fair game! Think your brother might have an insight? Give him a call!
- While each month has a theme, you need no special knowledge of the theme to solve.

## About Puzzled Pint

Riley stares into the **middle** of their cup. "Why is there a measurement called a 'cup'?" they ask while rolling their eyes. "There are so many kinds of cups, and they all were **selected** to hold different amounts. My new unit will get rid of this confusion once and for all!"

Riley looks at their pint glass. "Look, 'pint' is a boring name - it lacks any modern pizzazz. No one will be sad if we call it something else. It's not like any major puzzle organization has based its name around it."

### PUZZLED PAINT

You can turn a PINT into PAINT by adding a letter.

PRO	PER
SNA	KED
GRO	VES
MIS	SED
GRA	DER
BAN	ANA
BEA	DED
SCR	AMS
REC	USE

### PUZZLED PIN

Poke holes\* in the grid so each row, column, and bordered area has one poked hole. No two squares with poked holes can touch, even diagonally.

(\*No pin? Well, I guess you can draw stars in the squares.)

O	K	L	A	H	O	M	A
C	U	L	T	U	R	A	L
S	T	I	M	U	L	U	S
E	U	R	O	P	E	A	N
N	E	G	A	T	I	V	E
O	P	P	O	S	I	T	E
J	U	D	G	M	E	N	T
P	A	Y	M	E	N	T	S

### PUZZLED INT

All answers are integers.

$11 + 1 + 1 =$   
 $10 + 19 - 20 =$   
 $(40 + 20) / 15 =$   
 $15 + 15 - 16 =$   
 $(63 + 21) / 4 =$   
 $21 + 14 - 22 =$   
 $10 * 4 - 21 =$

### PUZZLED PINT-SIZED

Good things come in smaller packages.

SMALL ???????*	Spuds
SMALL ?*????	Modify
SMALL ??*??	Post office tool
SMALL-???*??	Objected to
SMALL ?*????	Earth
SMALL *?????	Curiosity
SMALL ??*	Cook in oil

### YO DAWG I HEARD YOU LIKE PUZZLED PINT

Just like a joey in its mama kangaroo's pocket, this puzzle set is inside a bigger version of itself. Each answer contains a smaller synonym of itself, like how DEPARTED contains the word DEAD. (DEpArTeD)

Riley stacks up a large chain of state quarters to pay for their beer. "The name 'quart' is pretty boring. It just means a quarter of something. We could name it after a person instead."

Having run out of other things to put on US Quarters, the Mint has started making Emoji quarters.

“Don’t even get me started on how bad a name ‘half-gallon’ is,” Riley scoffs. “That’s like defining a woman based solely on who her husband is just because she’s his ‘better half.’ My new name will give this measurement some **direction**.”

1. The eight people include four men (Anderson, Benjamin, Chance, Damien), and four women (Eloise, Felicity, Gretchen, and Hannah).
2. Everyone in this group is married to one other person in this group, and every couple is sitting next to each other.
3. The eight people are Anderson, Eloise, Chance’s partner, Damien’s partner, Gretchen’s partner, Felicity’s partner, the person sitting at position 1, and the person sitting at position 3.
4. Each couple consists of two people with the same number of letters in their name.
5. Hannah’s partner is sitting in a prime numbered seat. (The primes at this table are 2, 3, 5, and 7.)
6. Chance’s partner is sitting next to Felicity’s partner.
7. Gretchen’s partner is sitting in either seat 4 or seat 6.
8. The eight people sitting at the table are:
  - The partner of the person sitting across from Gretchen
  - The partner of the person whose seat number is double Felicity’s
  - The person sitting across from Anderson’s partner
  - The person sitting across from Eloise’s partner
  - The person sitting in the direction of the answer
  - The person sitting to the left of Felicity’s partner
  - The person sitting two to the right from Gretchen
  - The person who is sitting to the left of a palindromic name

Riley, seemingly out of breath after their whole presentation, looks at you. “So, what do you think of my new system?” You stare directly at them, then stare at them through the **empty** containers on the table. What feedback do you give them?

In each column, pour the indicated amount at the top of each into the containers below it. Containers hold differing quantities of liquid, as shown on the left. Containers must either be completely full or completely empty.

	1/2 gal	13/16 gal	13/16 gal	7/16 gal	1/8 gal	11/16 gal	3/8 gal	5/8 gal	0 gal
Half-Gallon									
Quart									
Pint									
Cup									

1 gallon = 2 half gallons = 4 quarts = 8 pints = 16 cups

Riley takes your feedback in stride, and as they are ordering a new drink, a new person comes up to you. "Hey, I couldn't help but overhear the argument you were having over units of measure, and can I point out that the metric system is much better? You memorize the prefixes, and everything else is good to go!" How do they feel about your system and Riley's system?
