

## Instructions for “Regular Difficulty” Puzzled Pint Quantum Physics Set

*Quantum Physics is weird! In Quantum Physics, things behave in mysterious ways.*

*Light can act like particles and waves at the same time! Particles can act like they go through two different open slits in a wall at the same time! Matter can act like it's in multiple places at the same time! Cats can be alive and dead at the same time!*

This puzzle set is also weird and mysterious!

**Each of the first four puzzles in tonight's set has two equally valid answers!**

If you find one answer, you can move on. If you find both answers, even better!

The Meta puzzle works with any of the correct answers you might find.

Happy solving!
