"Finally back from school! I bet Hobbes is waiting to pounce on me like always. Fortunately, I've got a trick for figuring out which of the 8 surrounding doors are safe to go through! I only ever go through doors that have exactly 2 things in common with the previous door. If all else fails, I just need to **dash** if I **spot** any trouble. Man, the things we do for . . ."

"We've got lots of goofing off to squeeze in this summer, so we have to plan ahead. It would be a shame not to **capitalize** on our newfound freedom, so some plans might need to overlap. I'll plan stuff that will need consecutive days of the same week, while Hobbes can take care of anything we want to do at the same time each week.

Looks like Mom and Dad already scheduled some things, but that won't stop us. We'd better leave room for a . . . !"

"Following a daring escape from the gelatinous Zogs of Gorzarg-5, our stupendous hero *Spaceman Spiff* has found himself lost in a strange system in the far dusty reaches of the galaxy.

A crude scan of the area reveals that it is divided into 9 sectors, each of which possesses two planets. Not only that, but it seems that all 9 vertical and horizontal slices also contain exactly 2 planets each. As for the planets themselves, they appear to be entirely surrounded by eight empty spaces or the edge of the system itself."

Garbled Transmisson

"As Spiff prepares to take off, he receives a transmission from the locals - directions of some kind, but it's hard to say. His ship is in rough shape: it can only travel in **four directions** and once it takes off it **cannot turn** until it reaches another planet.

Despite the situation, Spiff is prepared to take on anything that should **cross his path**. He'll surely make it out of here alive and return to good ol' Earth - which, compared to this crowded corner of the universe, is a . . ."

"Behold, the latest innovation in cardboard based technology! My patented Transmogrifier can turn you into anything you can imagine! It was working perfectly until I combined it with the Duplicator. That's when everything started to get... strange.

Now there's loads of Transmogrifiers and they all follow their own rules. Hobbes and I both took some notes trying to figure them out - each time we were confident at **first**, but **we got a little mixed up ourselves** in the process.

No matter what happens, I hope we . . ."

Calvinball

"What better way to round out the summer than with a game of Calvinball!
The best part of this game (besides being named for yours truly) is that
you can use pretty much anything you have lying around!"

We've got a pretty weird set of stuff today, but they all have
something in common with me, so they should work great!"
