# CLAIRVOYANCE

## GUIDANCE

First, close your eyes, feel the cards, every edge, every corner, every fold.

Second, consult the moon, it signals from afar whether you should cast your gaze outward or inward.

Third, count the stars. Numerology may be an imprecise method, but it is only by joining dots that constellations can form.

Fourth, love me, or love me not, you must take time to compute this information to understand it by and large.

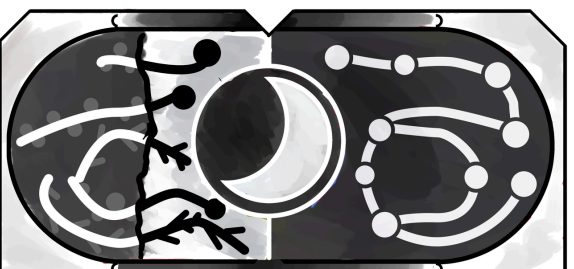

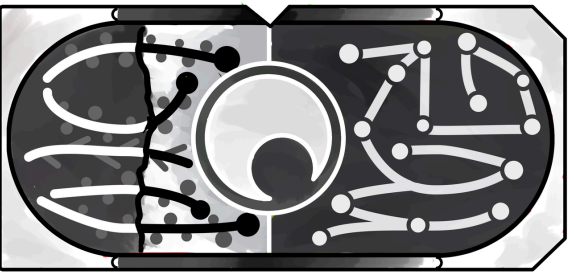

To gain the full picture, consider the *scholastic spread step by step*. If you only process one card at a time, you are likely to be stuck going around in circles.

Reading the cards, you will be guided to your final answer, and learn how to divine fortunes even if no card is turned.

The student has learned quite well.

Consider this a test of your developing senses. Below are some custom tarot cards. They have their backs facing you, but to a skilled reader, this is no obstacle. Follow the guidelines, and you will be able to read them easily.

I do apologise if the instructions seem vague, but it's often best to leave a bit of space for people to fill in the gaps.
